

REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 18

THE REDCLIFF REVIEW, THURSDAY, NOV. 27th, 1930

Number 16

Great Activity Now In Canadian Industries

Previously Idle Plants Now Running and More Coming.

Canada is assured of the expansion of present industries and the addition of scores of new plants, either of Canadian institutions or branches of British and American factories; this is the view of the industrial situation and outlook expressed by Hon. Senator Robertson, Minister of Labor.

Already new plants are assured and present industries especially textile, are working increased hours and employing more hands. A prominent Ottawa broker is acting for one Scotch and five American firms desiring to establish branches here, while the acting Prime Minister, the Department of Trade and Commerce and the National Revenue Department are receiving letters from other firms that will establish here. It is believed that by this time next year there will be established in Canada or in the course of establishment 50 or more new branch factories of British and American concerns.

A score of letters from various industries, Senator Robertson, to illustrate the industrial revival, has made a summary of several. Most of these letters were sent voluntarily by Manufacturers.

Several Canadian plants which have been idle or running part time for several years' past, are now running with greatly increased staffs others are making large additions to their plants in both buildings and equipment.

Among the industries which are increasing their staffs and adding to their equipment are: The National Fertilizers, The Monarch Knitting Co., The Dominion Textile Co., The Oshawa Dyeing Co., The Sherbrooke Paper Manufacturing Co., Carl Stohn Co., Canadian Calanese Co., Renfrew Woollen Mills, Groulx Ltd., and Harris Woollen Mills.

All these plants are now helping to solve the unemployment situation in Canada as a result of the present government at Ottawa.

Legion Auxiliary To Have Concert

The Ladies Auxiliary to the Legion are putting on a concert in Cameo theatre on Thursday, Dec. 4th. The proceeds are for the Legion Xmas Cheer. Admission 50c for adults and 15c for children.

Mrs. Malcolm Stewart, of the St. Ambrose Vicarage, left last Monday for Regina where she will visit her parents.

After years ago, Mrs. W. A. Freeman, of Ardenburg, Alberta, a native of Wisconsin, was a pair of bronze statues in a raffie. Today she has the largest turkey ranch in Canada and is the acknowledged queen of turkey raising in the Dominion. Her turkeys will return a revenue of \$10,000 this year.

Coming for the first time to Saskatchewan, the Western Canada Fair Show will be held December 2nd at Saskatoon. Last year more than 200,000 people came to the fair. It is expected this year's show will be the largest yet.

Directors of the Co-operative Wholesale Society of Great Britain who recently concluded a tour of Canada have expressed themselves as greatly interested in the business situation here. It is believed that in 1931 they will have indicated that in all probability they will visit the Exhibition and Conference at that time.

Red Cross Supper Here Last Tuesday

Not As Well Patronized as it Should Have Been

Considering the trouble to which officers members and help of the local Red Cross Society went for the supper put on in the Gordon Memorial Church last Tuesday evening, the attendance was not as large as was expected or as it should have been.

Well wishers responded liberally to the request for provisions, and enough was on hand to feed twice the number who attended. The supper hall was also nicely decorated and the tables were bedecked with fine supper as has been put on here. The service, which was handled by a spooly number of ladies dressed as Red Cross nurses was just the kind that made one eat whether he was hungry or not. The whole layout was so inviting and appetizing that the pity is more did take advantage of it. Indeed some were heard to remark that possibly not enough attention was given to the selling of tickets.

However as most of the provisions were donated and as some of it was sold privately after the supper, the executive will have a tidy sum to add to their funds.

Local officers have asked us to extend their hearty thanks to the different organizations and individuals who rendered such valuable assistance.

U. F. A. MEETING

The regular monthly meeting of the Harrogate Vale U. F. A. Local will be held in town on Saturday evening of this week. As many matters of importance will be discussed a full attendance is desired. Any interested parties whether members or not are invited to attend.

The Rink Committee Has Pleasant Evening

All Present Enjoy Evening of Cards and Dancing.

It was possibly because of the many other counter attractions that the social evening last Friday given by the Skating Rink executive was not as largely attended as it otherwise would have been. Despite this it was fairly well attended and those who were present thoroughly enjoyed the program put by the Committee who did everything possible to make the event a success.

Progressive Whist was the first order of the evening. In this there was keen competition and friendly rivalry which added much to the enjoyment of the game. When the tables were counted it was found that Miss Evelyn Jones had won the prize and Mr. A. Dubois the gent's. Mrs. Newman and Jim Pedesta captured the consolation prizes.

After cards the floor was cleared for dancing and the snappy music had all on their toes. A dainty lunch was served at midnight. On the whole a very pleasant evening was spent and the committee had a small surplus to hand over to the rink fund.

Highway Surveyors Here

G. McMillan and his staff of Surveyors have taken up quarters in Redcliff and are now busy making a survey of the main highway between here and Kinross. They are quartered in a house on Fifth street and will remain there and work out of Redcliff until weather conditions make it impossible for them to carry on.

Good Comedy Coming To Gordon Memorial

Will be Put on by Medicine Hat Talent

Gordon Memorial Church has made arrangements with entertainers from Fifth Ave. Church, Medicine Hat, to put on their amusing comedy, "The Rummage Sale," in the basement of the Church here, on Tuesday, December 2nd.

There will also be a musical program during the evening. This play and program was put on in Medicine Hat and according to press reports it was highly entertaining. Don't miss seeing it here next Tuesday. Admission, Adults 35c and Children 20c.

DUTTON-MONDS

A very quiet wedding took place at Fifth Ave. Parsonage on Saturday, November 22, when Ellen Madeline Monds, of Medicine Hat, became the bride of Thomas Dutton, of Redcliff. Rev. E. T. Scragg performed the ceremony.

The Ladies Aid of Gordon Memorial Church will hold their annual Christmas sale of plain and fancy sewing also hosiery and afternoon tea. In the Church basement on Wednesday, afternoon Dec. 10th.

The voter's list for the year 1931, has been prepared and is now open for inspection at the office of the Secretary Treasurer of the town from nine o'clock in the forenoon to five o'clock in the afternoon, except Saturday, on that day from nine o'clock to 12 o'clock noon. Any persons name who does not appear shall make application in writing before December 1st, 1930.

Ladies Form Auxiliary To Local Legion

Elect Officers at Meeting Held Last Monday

Last Monday afternoon a number of wives, daughters and sisters of returned men met in the reading room of the Legion Club and after some preliminary discussion decided to form a ladies Auxiliary in connection with the local Legion. Mrs. Whelan and Mrs. Wright, president and vice president of the Medicine Hat Auxiliary and several other ladies from the Sister organization were present and rendered valuable assistance in the work of the meeting.

The following officers for the organization were elected: President—Mrs. J. Kitchen. 1st. Vice, Pres.—Miss Moore. 2nd. Vice, Pres.—Mrs. Balmer. Sec. Treas.—Mrs. G. Davies. Ex. Com.—Mrs. D. McLachlan. Mrs. A. Paterson. Mrs. D. Phillips, and Mrs. A. Hodges. Convener of Sick Com.—Mrs. G. Grieves. Convener of Social Com.—Mrs. D. Kitchen.

The conveners were given power to add to their numbers.

It is the intention of the newly organized auxiliary to render all possible assistance to the Legion in carrying on their work in this district.

With this list of experienced and active officers the auxiliary starts out under most promising prospects. The ladies will be given every encouragement in their undertaking.

The Review has just learned that Miss Maggie Deere and Alf Dutton, both of Redcliff, were married in Calgary last Monday.

Here and There

(Continued) In connection with Canada's selling ability, Lord Stansfield, former Governor-General of Australia, interviewed at Wembley recently after a tour of Canada by Canadian Pacific Railway, urged that the Dominion do everything in its power to secure inter-empire trade and specially of such articles which are particularly the products of one another, citing olive fruits of Australia as an example of worth-while imports for Canada.

Winners of dual grand championships of Chicago and Toronto fairs, two fine Clydebuilt sailboats from Saskatchewan, "Saucerino" and "Lochaber," are showing at the Royal Winter Fair in Toronto, November 19-27. Large experimental farms in the fair including the Prince of Wales "E.F." ranch, are also well represented in the entry lists.

Cultured, educated women, taught by tutors when they shared with their husbands, entered in China prior to the 19th century and before the western world had attained any high degree of civilization. Dr. T. Calverton Wood, principal of the Peking Girls College School, Oxford, declared when interviewed on board S.S. Empress of Asia recently. She broadcast a message to women of all countries, stating that Chinese women are no less intellectual than their European sisters, if given a chance to learn.

It is expected that the improved ship channel in the River St. Lawrence as far as Montreal, giving a 24-foot depth for ocean liners, will be completed by 1934. This will enable liners of 16,000 tons gross to reach Montreal, 1,000 miles from the Atlantic, the largest inland port in the world.

According to the president of the Radio Manufacturing Association of Canada, the per cent expansion in the Dominion on radio sets in 1929 was the highest in the world. In 1929 Canadian sales were \$10,000,000 on radio and equipment.

Guaranteed strawberries from British Columbia put up in canning found a ready market this year. About 100,000 pounds were bought by American interests and large quantities were bought in Bakersfield. It is reported about seven cents a pound to the grower.

Quiet Session of Council Last Monday

Only Routine Business Came Before Meeting.

Town Council had a quiet session last Monday evening. After the reading and adoption of the minutes of the previous meeting.

A letter was read from the Anderson agency in connection with Liability Insurance. It was received and filed on motion of Councillors Cox and Brydie.

On motion of Councillors Campbell and Dacre the secretary was instructed to advise relations of the late John Evans, of his death.

Moved by Councillors Brydie and Dacre that the secretary write Medicine Hat hospital advising that the town is not responsible for the late John Evans' hospital bills as we were not advised of his being a patient there. Carried.

Accounts passed by the finance committee were approved for payment.

LEGION AUXILIARY TO HOLD MEETING

The first monthly meeting of the Women's Auxiliary of the Canadian Legion will be held in the Legion Club rooms on Tuesday, Dec. 2nd at 2:30 p.m. and every first Tuesday of the month thereafter. All members are asked to be present and an invitation is extended to all ladies interested.

Mrs. G. Davies, Secy.

Morning service 11:30
Evening Services at 8:00.
Choir practice every Thursday evening at 7:30.
Everybody welcome. A special invitation is extended to those who have no church home or do not attend any Sunday School.

To Command New Canadian Pacific Giant

Captain R. G. Letts, more familiarly known to trans-Atlantic passengers as "Jack" Letts, has been selected to command the new 25,000-ton Canadian Pacific liner Empress of Britain. The promotion comes to Captain Letts after 28 years' service with the Canadian Pacific Steamships, which he joined in 1901 with the rank of 4th officer. In the next six years Captain Letts sailed several ships and eventually became chief officer of the Montserrat. Six years later, in 1923, he was appointed to her to make the Empress of Britain, which was later renamed the Empress of Australia, command of which he relinquished after six years of service. He is now the youngest of Britain, the last stages of her construction.

During his many years as commander of Canadian Pacific liners on the St. Lawrence service, Captain Letts has conveyed many famous people across the Atlantic, numbering amongst his more distinguished friends H. R. H. the Prince of Wales, who launched his new command, Prince George, the Duke of Gloucester, Lord and Lady Willington, Rt. Hon. Stanley Baldwin, Rt. Hon. L. G. M. Amery, Rt. Hon. Winston Churchill, Baron Hugg of Vinty, former Governor-General of Canada and commander of the Canadian Corps in France; Prime Minister Ferguson, of Ontario, Lord Dawson of Penn, physician-in-ordinary to H. R. H. the King, and many others distinguished in the fields of finance, politics and art.

The Empress of Britain, which will make her maiden voyage to Quebec next June, is here shown in an artistic presentation of what she will look like when she enters service next June. Captain Letts is in command.

Co-Operative Plan To Build Up Livestock Industry And Find Market For Western Grain

A plan to build up the livestock industry of Eastern Canada, and at the same time provide a market for a part of the grain surplus of Western Canada, has been devised by the interested parties.

Western wheat pools, Eastern livestock interests and packers have conferred with the Ontario Department of Agriculture, the Ontario Agricultural College and the Dominion Department of Agriculture, resulting in the appointment of J. H. Newman, the Wheat Trust's Toronto representative, and S. E. Todd, secretary of the Industrial and Development Council of the Canadian Meat Packers' Association, to work with the government in furthering the plan.

Hon. George Weir, Minister of Agriculture, has authorized the Dominion livestock branch to put into operation for a period of one year, ending January 31, 1931, a feed purchase policy which will enable the Eastern Canada Livestock Raisers' Association to buy grain at a price to amply offset the stock from western herds.

Under this policy the Dominion branch will pay one-way railway fares, birth and living expenses on a per capita basis to the Eastern Canada Livestock Raisers' Association, who agree to purchase one or more carloads of grain or feed from the west, to be brought east for finishing on the standard prices current in grain feeds which the Wheat Pool guarantee to supply.

The plan, already in operation, is designed to make of the agriculture and animal husbandry a co-operative business; to have grain growers share the cream of good profits in the first season and operate at a loss in the last; to have cattle breeders reap a harvest when the grain is low and feed high; at cost when grain is prospering.

Unnecessary Loss Of Life

No Excuse For Fatalities Due To Automobile Accidents

Here is a striking comparison and one which merits study: the American fatalities in action during the World War totaled 27,581; the American fatalities from automobile accidents during 1929 totaled 33,061. This fact is driven home in a recent cartoon by J. N. Darling, published under the caption "Why All This Discrimination." That the number of automobile fatalities calls for definite and drastic action no one will deny.

Just the same, there is another side to the obituary which it were well not to ignore. These 37,581 fatalities of the war years were mostly men in the prime of life, who were sacrificed to the world's intolerance and hate. They were drawn perforce into the maelstrom of destructive forces in the inevitable turmoil of war's frightful ravages. The 33,061, of 1929, were victims of foolishness and carelessness in many cases. It is true, but more particularly of the fact that to date one of the greatest advances in the world's material history has not yet been completely controlled.

Before passing final judgment on this situation therefore, it is well to balance the countless frightful after effects of the war, aside altogether from bodily injuries against the equally countless blessings that the automobile has conferred on millions of individuals. After all is said and done, nothing can excuse the unnecessary and inordinate loss of life due to the automobile. That an agency capable of good should be linked in such close association with tragedy is in the highest degree deplorable. This fact calls for the greatest individual care and watchfulness as well as vigorous legislative measures.

— Christian Science Monitor.

Soap in very hot water is probably much more fatal to bacteria than soap used in warm water, a British physician states.

It now takes only four days to cross the Sahara Desert from Algiers to the Niger River by automobile.

Drunk: "Hands up, or I get it!"
Stuttering flustered, flustered.

W. N. U. 1524

Advantage Of The Silo

More Silos Should Be Constructed In The Western Provinces

The silo is a valuable means of storing feed for winter use or to supplement the pasture in spring and fall. By properly packing it, particularly at the sides, when filling, and by removing the loose feed at the bottom, a succulent nutritious feed is available for all classes of stock at all seasons of the year, with very little loss. Silage has certain laxative properties which keep the digestive organs of animals in good condition. Animals receiving some kind of succulent feed have keener appetites, better and more pliable skins, and are more healthy and vigorous than those fed exclusively on dry rations.

Each year is marked by the erection of a few more silos in the prairie provinces; but unfortunately the number is less than would be required by the success which attends their use. At the Dominion Experimental Station, Lacombe, Alberta, three general types of silos, the above-ground, the pit, and the trench, have been used for a number of years with much excellent results, that we have no hesitation in recommending them to anyone keeping a number of live stock.

The above ground wood stave silo gives satisfaction as far as it can be given in this climate of cold winters. Freezing is the great drawback. Where it is built in the open, excessive freezing can be prevented by blowing a straw stack around it at threshing time and the straw can be used for bedding in the spring and summer. A silo 16 feet in diameter by 36 feet high holds about 150 tons of feed.

In sections where the water line is far below the surface of the soil, pit silos might be used. They are not so difficult to construct as a hole dug into the ground must be used, but they have the advantage of being easy to construct since the farmer's main outlay will be in the form of labor and the silage does not freeze.

One of the desirable features of the trench silo is its low cost. Any farmer can make one with practically no outlay. A few days with a trowel and scraper will excavate a trench the required length and depth and some straw will do as a cover. During filling, the ensilage should be kept evenly and well tramped. The usual depth of the trench silo is 8 feet. A width of 14 feet at the top and 10 feet at the bottom is the usual width. A herd of 15 cows will require a silo 50 feet long. A trench silo should be located only after careful consideration of the drainage, soil, and feeding convenience.

Big Salmon Pack

British Columbia Pack Largest For Good Many Years

Yielding the largest pack for a good many years, the run of salmon in British Columbia waters has more than held its own for the current season to date, according to the Chief Supervisor of Fisheries. The pack of the sockeye, so far, amounts to 308,000 cases, the largest since the breed year 1925, and comparing with the last ten year average of 304,000 for the whole season.

Preliminary drilling at Ceuta, Spain, in connection with the proposed tunnel under the Straits of Gibraltar, will be started shortly.

DUCHESS OF YORK AND PRINCESS ELIZABETH

The shawl collar is white crepe silk. It ends in a most unusual manner at the left side, indicating the natural waistline. Beneath the buckle the bodice is caught in a pleated skirt that creates a notched line across the front.

Its simplicity makes it particularly attractive for street without a coat.

Style No. 2564 can be had in sizes 18, 38 years, 38, 38, 40, 42 and 44. Pattern price 35 cents. Be sure to fill in size of pattern. Address Pattern Department.

The rainbow make has a beautifully lined skirt, which justifies the name.

The world's population is now estimated at more than two billion.

Beautifying Highways

Planting Of Trees Along Main Highways In Western Provinces Would Be Excellent Plan

The good roads movement is branching out in new channels. Up till recently the emphasis has been on highways themselves. The spread of motorizing has produced a demand for all-weather roads linking centers of population. Today the results are visible in every Canadian province and American state. Now the good roads advocates are turning to other features of highway work. At its latest convention the American Automobile Association passed a motion instructing its legislative committee to study highway aesthetics. There are three objectives:

To regulate advertising signs on highways so that they will not mar scenic views or add to the accident hazard.

To banish the broken down motor cars and junk which spoil many roads and have a depressing effect on temperamental motorists.

To encourage the improvement of highways by tree planting, boulevarding and other methods.

This program is one with which motor clubs everywhere will sympathize. In Saskatchewan plans for beautifying roads might seem premature, since the province's need for all-weather highways is not yet satisfied. Saskatchewan is still in the road building stage and for some years to come tree planting and graveling will be the varieties of road work most in demand. Still, there is no reason why anything should not be done now to conserve and create beauty on the provincial highways.

Prior of all, advertising signs might be "regulated" with greater severity. In the national parks and the scenic areas of the motorists are immediately relieved by the complete absence of all signs, billboards and posters, except government road markers. Not even the small advertisements which are attached to telephone poles and trees are permitted. The traveler is not distracted by these in places and stickers which infer other parts of the country. It may be that absolute prohibition is the right way of dealing with the billboard blight on country roads, but at any rate regulation is essential if the highways are not to be degraded.

Tree planting on rural roads would immensely increase the pleasure of motoring in Saskatchewan. A start could be made on one of the most frequented highways near some center of population. Motor clubs should study the question and evolve a proposal—Saskatoon Star.

Real Postal Service

Letter Has Recently Delivered By Mail On Envelope

"Believe It or Not," a letter written by a Rochester angler and addressed "To Sister of Boats on Canadian Lake (E. by N.E. shore) near Hemlock, N.Y.," was delivered the following day.

To add the mail carrier in finding his man, whose name the sender did not know, the writer drew a map on the envelope, showing the Hemlock, Canada and Hemlock Lakes, with an arrow pointing to a spot labelled "Here it is."

Twenty-five hundred tons of heavy machinery and field supplies for a dredging company in Australia are to be transported by aeroplane to the scene of operations.

Coal Problem Survey Reveals Many Anomalies In Existing Fuel Situation In Canada

Babies At The Fairs

The Red Cross Provides a Valuable Service To Mothers Attending Summer Exhibitions

The great event of the year to many prairie women in the province of Alberta, is the annual fair and exhibition which is held in the largest central town, and draws attendance from every remote hamlet.

Agricultural exhibits with each other, stock is groomed and exhibited with pride by youthful farmers, competition is keen in every line and there is abroad a good feeling of healthy camaraderie and rivalry. A special place is given to the women's work, and in every country fair one can see the triumphs of the needle, and the rolling pin, the fruits of the vegetable market and the display of vegetables making a wonderful picture of color and beauty.

Seeing the Fair and enjoying the Midway is all the vacation that some farm women get from year to year. However, with small children, and in areas and others trails behind, there is not much peace or pleasure. The Alberta Red Cross, one of the friendliest and most human of the service organizations of the day, offers an unique type of assistance to mothers in the number of the Fair.

Well equipped day nurseries are run by experts, where babies sleep in cot and cradle, older babies enjoying the sport of sandpiles and swings. Refreshments are served free of charge and a happy day is enjoyed by the small people who are too young to be entertained at the Grandstand. "Red Cross has given me a real holiday, the first in my life" was the tribute paid by one tired mother.

Business Picking Up

Increase In Trade For Canada Is Shown By Statistics

A slight pickup in trade in Canada is indicated by early statistics for the month of June. The Bureau of Statistics. Increased imports of raw rubber over the preceding month, and increased exports of manufactured rubber goods indicate increasing activity in the rubber industry. Newspaper exports in July were higher than in June, and exports of other paper manufactures were well maintained. Dairy products were exported in larger quantities, particularly cheese and butter, with China taking a large proportion of the butter exports, and Great Britain and the Irish Free State taking the bulk of Canada's cheese. An increase in exports of fresh milk to the United States is noted.

Wheat For All Parts Of World

Vancouver Has Attained Importance As A Grain Shipping Port

During the 1929-30 crop year which ended July 31st, last, a total of 465 ships loaded 40,975,282 bushels of grain at the port of Vancouver for world ports. This means an average of more than one ship for every day in the year. Of this total 39 ships took full cargoes at the port.

A survey of the shipments for the season shows that 314 vessels were loaded with 42,828,497 bushels for the British Isles and European ports, 99 took 5,617,228 bushels for the Orient; 34 ships with 817,930 bushels cleared for Central and South America; 11 carried 121,864 bushels to Australia and New Zealand, and seven loaded 288,563 bushels for South Africa.

Prevents Mild Winter

A mild winter with a light snowfall and sharp cold waves of short duration will be experienced in North America this year, delegates to the International Apple Association at Grand Rapids, Mich., were told by Herbert J. J. Brown, of Washington, long range weather forecaster. He also predicted a hurricane would strike Florida late in September, and said there would be no serious drought through the country next summer.

To Help British Farmers

In order to help British farmers, the proprietors of "Oranthe," the food beverage, are using nothing but British milk—thousands of gallons a day—and British barley. In order to obtain an adequate supply of British eggs they are establishing a 300-acre egg farm.

Prairie Harvesting

Combines are used to harvest wheat, oats, barley, spring rye, flax, sweet clover and bromo from Winnipeg to the foothills of the Rockies and from the International Boundary to the Peace River district.

A survey of Canada's coal problem, a restatement of the anomalies of the nation's existing fuel situation, and some recommendations for coping with the future are contained in a volume published called "The Fuel Problem of Canada," by Martin Nordberg, of Ottawa.

Mr. Nordberg, who has been intimately associated with western coal-mining for many years, first of all looks over the present situation, and in doing so discloses some striking facts. Canada uses 13,000,000 tons of coal annually, of which 20,000,000 are imported. Yet Canada holds one-sixth of the total coal reserves of the world, most of it of sufficiently high quality to take the place of imported coal. At present the prospect of remedying this situation seems to the author to be not very good. Unless Canada takes independence, he put far into the future.

There are, according to the book, many factors which contribute to this anomalous coal situation in Canada, among them being wasteful and inefficient control of the coal industry as a whole; the duplication of mines; the failure of coal owners to look beyond the mere profit and to seek their business in the failure of the railways to make the most of their opportunities; faulty and incomplete methods of coal mining; and a general apathy on the part of the public and governments.

Mr. Nordberg's chief recommendations for putting an end to the present system are as follows: The introduction of low temperature carbonization coke plants in Canada; appointment of a Dominion fuel commission with wide powers and ample funds; cancellation of unneeded mine leases; the allowing of new mines only when economically justified; readjustment on reasonable lines of tariff and drawback arrangements; elimination of duties on coal-mining machinery and material; and the forms of provincial taxation; the merging of existing mines wherever possible; the formation of coal syndicates for co-operative marketing and improved retailing methods. There must first be brought about a unification of mine lease national welfare," adds the author, "a determination to waive petty personal, local and provincial measures. There should be no half-hearted measures. There must be a determined Canadian fuel development plan."

Costs Of Harvesting

Plan To Study Costs Of Different Methods Used In Saskatchewan

Plans have been made for studying the costs of harvesting Saskatchewan's 1930 grain crop by the different methods now in use. The Department of Agriculture, Engineering, and the Farm Management Department of the University, are attempting to inter farmers in keeping track of all costs incurred in harvesting and threshing the crop.

The University is also conducting a series of operation of the combined harvester-drawbar a card has been printed for distribution to the farmers of this province. This card is similar to one printed earlier to record the costs of operating the farm tractor.

These cards are available for free distribution to those who care to make use of them and who wish to add to their costs of harvesting and of tractor operation.

Macaroni Factories

Canada has twelve factories for the manufacture of macaroni and the annual production is of a value of about a million and a half dollars, according to the latest figures available.

Whistles and bells in cities are rung at once if more tin is used in their manufacture, according to a British specialist in metals.

Scientists of the Byrd Antarctic Expedition discovered lichens growing within 300 miles of the South Pole.

Here and There

(112)
History was made in Canada when Chief Simahwah Wahwah-kische (running deer) of the Ojibwas, met and greeted in the Ojibwas Chief Ocasqueto (Deer) of the Innuits, at Canajoharie Indian Reserve, near Montreal, recently. There is no record of these chiefs ever having met before in Canadian history. "The Ojibwas" chief is better known as Paul Canjoharie, head Indian guide, for the past thirty years at Nipigon Camp, northern Ontario. Neither could speak a word of the other's language and conversed through the medium of English.

Judges of the annual fishing contests held at French River, Nipigon and Devil's Gap (Lake of the Woods) bungalows camps, have announced the winners as follows:—W. H. Graf, of New York, and Frank W. Blumens, of Chicago, tied for trophy at French River with a 30-lb. muskellunge each; J. H. Loun, of Hammond, Ind., won the Nipigon trophy with a 14-lb. speckled trout, closely followed by Max Huddy, of Kansas City, with a 7-pounder; and A. H. Joslin, of Cincinnati, took the Devil's Gap trophy with a bass weighing 2 pounds, nine ounces.

The destinies of Canada and Japan lie together in the great Pacific Ocean," declared Ito, Japanese Minister, K.C.V.O., first minister to represent the Emperor of Japan, when he reached Dominion Hall here with the arrival of the Canadian Pacific liner Empress of France, at Vancouver recently. He was accompanied by Togo Tokuma, Japanese Consul-General, both of them being on their way to Ottawa where the former later delivered his credentials.

What is regarded as a record movement was made recently at the Saskatchewan Wheat Pool Elevators No. 7 at Port Arthur, when in 46 hours, 550,000 bushels of wheat were transferred from the elevator to the hold of the steamship LeMayne. There were periods during the loading of the ship when the wheat was carried like a torrential golden river from the elevator at the rate of 2,000 bushels per minute.

Fifty different steamship lines now serve to carry Canadian products to every continent from the port of Vancouver, states a recent trade review issued by the Royal Bank of Canada. The review adds that in a period when the other great ports have had difficulty in maintaining their previous volume of trade, traffic through the port of Vancouver has experienced steady growth. From 125 ocean-going ships in 1917, the number increased to 3,344 in 1928. During the past year total trade of the port had a value of \$180,000,000.

The largest muzzel beef crop on record in Southern Alberta is being harvested in the Raymond district centre of the industry. About 8,500 acres were sown to muzzel here this year, 2,000 more than in 1928 and the crop will on estimate yield about eight tons or 20,000 above last year's production.

Cable advices from London state that Captain Ronald Stuart, V.C., D.S.O., D.M.C., R.N.R., commander of the Canadian Pacific liner "Empress of York," has been officially selected to attend the Armistice Day ceremonies at the Cenotaph in London. Captain Stuart is one of the youngest liner captains on the North Atlantic and the only passenger ship captain to visit the Victoria Cruise. It is expected that he will also be present at the Prince of Wales dinner in V.C.

Up to the end of August, says Colonel J. E. Dennis, chief commissioner of the railway's department of colonization and development, the Canadian Pacific brought to Canada 1785 boys for placement in agricultural employment under the distributive scheme of the company. "This is the largest number of British boys brought out to the Dominion by any one organization," says the Colonel.

Back from a month's wanderings along the line of the Dominion Atlantic Railway in New Scotland, Juliette Gaultier de la Verendrye, noted following artist, stated that she had discovered 200 folk-songs that were either quite unknown hitherto or else were interesting variations in melody and tune to similar songs in vogue among the French-Canadian habitants. She will sing some of them at forthcoming concerts.

During the first five months of the year 8,500 homesteads representing 562,500 acres of land were taken out in Alberta, settling being mainly in the Edmonton, Grande Prairie, Peace River and Prince Albert districts.

Gold produced in Ontario in the first nine months of 1929 had a value of \$24,755,562, or in excess of a million dollars over value of production in first nine months of 1928.

Breaking all previous records for handling of Japanese oranges, a special Canadian Pacific Railway train consisting of 25 cars of the Oriental fruit, arrived at Winnipeg recently about 48 hours after leaving the coast, in time for the first Puget Sound oranges to be on the market. The whole consignment from the coast consisted of 40 tons but were holding a total of 1,500 tons of the Japanese delivery.

About 2,500,000 fry and 240,000 eyed eggs, or total of 2,740,000 prospective fish, was the record output of the Banff hatchery this past season. The eggs were covered with difficulty by jack herring in the Bear Creek Valley watershed of Lake Louise. The fry were widely distributed over western areas.

Statistics show an increase of 1,000 vessel arrivals in the Port of Vancouver for the first nine months of this year above the number for the same period last year. Not tonnage shows an increase of 100,000 tons inward and outward tonnage shows a corresponding increase. Tonnage arrivals was made up by 23 more deep-sea vessels; 22 foreign coastwise; and 871 more local coastwise.

Editors representing the leading farm papers of the United States will tour Eastern Canada by special train next summer as result of a joint invitation extended to the American Agricultural Editors' Association at their annual convention recently held at Chicago, by representatives of the Canadian Government and the Canadian Railways. The tour of Canada will last fifteen days and will afford the visiting editors an opportunity to study the agricultural and industrial development of the provinces of Ontario, Quebec, New Brunswick, Prince Edward Island and Nova Scotia.

First Rate Hotels or Poor Stopping Places

Under the present Liquor Act of Alberta there is the closest supervision of all licensed hotels and a plan of continued improvement of the operation of Hotels is possible only under the Act as it now stands.

The Commissioner says who shall run the licensed hotels and the Liquor Board inspectors exercise the closest supervision, demanding as the licensee's funds permit, better equipment and better service to the public.

What a difference when compared with Prohibition days! No supervision, poor furnishing, poor tables. No control whatsoever.

NOW IT'S ALL CHANGED
DO NOT SIGN THE PROHIBITION PETITION. IT MEANS CLOSING CLUBS AS WELL AS BEER SLOOPS.

Leave the Act alone. We don't want the bootlegger back again.

WORLD HAPPENINGS
BRIEFLY TOLD

Ruth Alexander, San Diego aviator, holds credit for being the first woman to fly from Canada to Mexico without a stop.

H. Royal Higgins the Prince of Wales now has three new vice-admirals, Lieutenant-general, and air marshal—through promotions in three British fighting arm.

With the increase in motor traffic in London suburbs, divisional police cars are being used, as occasion demands, as mobile units to speed up crawling traffic.

Troops sent to release two British missionaries, Miss Harrison and Miss Nettleton, held captive by Communist bandits in Fukien for two months, returned without accomplishing their mission.

Ontario motorists, who become involved in accidents, fail to pay judgments or are convicted of serious traffic offences, will have to be insured before they are allowed to drive again, according to a law which is now effective.

Caught by a wind as they banked around a marker on the course, Capt. Charles Sutton, Toronto, was killed, and his mechanic, Claude Mills, also of Toronto, was injured, when their Fokker plane crashed into Lake Ontario.

The interior finish for five new Canadian National dining cars was obtained from the famous Mort and Walnut trees, which grew for centuries at Oxford. When the butt and roots of the ancient tree were trimmed ready for conversion into beautiful veneer, they weighed 15 tons and yielded 75,000 feet.

Twenty persons were injured when the night train from Glasgow through the tunnel at Buxton station derailed. The first of two locomotives drawing the train smashed into the buffers and damaged the second engine, while several coaches telescoped, the third coach penetrating six feet into the second.

The Indian Problem

Sir John A. Simon Expresses Difficulties To Audience in Washington

Sir John A. Simon, head of Great Britain's Indian statutory commission, expressed hope, in a speech at Washington, for "some way of advance" on the Indian problem.

Straining difficulties during the past, the British statement asked for United States sympathy "in keeping with the United States sense of fair play."

"This third visit to the United States," Sir John said, has impressed him once more with this country's "abounding vitality."

"I cannot say that this has been affected by economic conditions," he added.

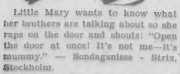

The tall, blue-eyed visitor, one of England's leading Liberals, in Washington as one of a party of guests of the American Bar Association, discussed "the enormous task" in India.

"There is no division of opinion in England on our policy in India," he said. "It is, as stated in the law of 1919, the gradual development of self-governing institutions with a view to the progressive realization of responsible government in India."

The two great difficulties, Sir John said, are that the vast mass of Indians are villagers, living their lives with customs entirely different from those of "the educated, political minority," and that India is composed of "so many mixed elements that America's mixture is the palest reflection."

Ultimate solution of the problem, Sir John believes, "will not be a mere imitation of the representative government British and Americans have worked out for themselves."

He declared an effort to transport such a government to India would be "planting a seed in soil that does not grow the tree."

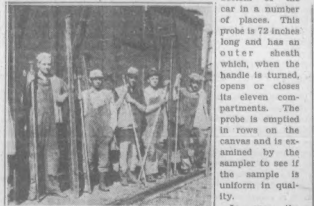

W. N. U. 1854

GOVERNMENT GRAIN SAMPLING

System of Sampling As Carried Out By The Government Inspection Department

The following describes the thoroughness of the system of sampling as carried on by the Government Inspection Department. We are indebted for this article to the Seattle Grain Co., Ltd., Winnipeg.

Upon arrival of a trainload of grain at an inspection point a Government yard clerk lists the cars from the waybill which follow each car, listing car number, kind of grain, point of origin, destination, name of shipper and consignee. These details are necessary for the issuing of Inspection Certificates. Sampling begins with the first car and proceeds to the train. The car opener breaks the seal and a record is taken of them. With a pinch bar the door is pushed open. A sampler then mounts a ladder, levels the grain just inside the door and spreads out a sheet of canvas two and one-half by six feet. Then comes the extremely heavy job of pushing the brass probe to the bottom of the

Men Equipped With Ladders, Probes and Canvas Ready To Sample a Train

car in a number of places. This probe is 72 inches long and has an outer sheath which, when the handle is turned, opens or closes its eleven compartments. The probe is emptied in rows on the canvas and is examined by the sampler to see if the sample is uniform in quality.

In case the grain in one part of the car proves to be poorer than the rest of the car, three samples are taken instead of one; one being of the inferior grain; another of the better grain, and another of the average of the whole car.

The sampler writes the car number on a cardboard ticket, date, load limit, showing depth of grain, and initials of the sampler. Thus making a complete record of the sampling of each car; the grain and the cardboard ticket are put into four-pound canvas bags and the string is drawn tight. The car door is closed and a new set taken.

Cars are also examined as to their condition; a careful examination being made for signs of leaks and a record is made of the seals and the condition of each car, also, if any. This work is done by separate crews.

When the entire train has been sampled, the samples are collected and are brought into the Government grain yard office, where the car numbers and the kind of grain are checked from the train list to detect any possible errors. Inspection sheets are also written up in the yard office from the train lists. After the samples have been checked the strings are drawn tight and inspection sheets are despatched by truck to the Central Inspection Office for grading.

Doors Are Sealed After Sample Is Taken; Then Car Is Tied To Door Until Collected

In many cases, it is impossible to get a good sample on account of cars being loaded too full. A good sample means seven good probes (e.g., to the bottom of the car) as follows: One in each corner, and three down the car lengthwise. When less than seven good probes have been taken only a provisional inspection is made, final inspection to be made later.

Cars like these will not be inspected until all uniformity is restored. Trains arrive at all hours, day and night. During the fall rush, trains of grain leave the Winnipeg yards every twenty minutes bound for the Head of the Lakes, and for a long period during the fall rush of 1928, upwards of three thousand cars were sampled in the Winnipeg yards every twenty-four hours.

The samplers and foremen are in line for promotion to Deputy Grain Inspectors, providing they are able to pass a very strict practical examination set by the Chief Inspector and the Civil Service Commission.

The sampling is carefully done and the system is recognized as being most thorough; wherever possible there is a double check on the work.

All-Canadian Highway

Only One Stretch Of Road In Northern Ontario Remaining To Be Built

An all-Canadian road from coast to coast is practically completed, only one stretch in Western Ontario remaining to be built up, according to officials of the Canadian Automobile Association.

No one now needs to hesitate to travel from Manitoba, clear across, over the Rockies to British Columbia. The old-time "jumbo" roads which spell disaster to motorists are now replaced with first-class gravel stretches and all dangerous curves and turns of less than 100 feet radius have been eliminated.

The one stretch of road which remains unfinished is that in northwestern Ontario, passing around the northern shore of Lake Superior. With this exception the condition of the roads all through from the coast to the coast and all Provincial Governments are co-operating in the project of an all-Canadian highway.

Some Curious Trees

Among the curious trees which have been found on the banks of the River Amazon, in South America, is one which has a sweet edible resin and with consistency of red sugar in the bark, and another which exudes an oily substance with the appearance, taste, and other qualities of lard.

Canada's Coal Production

Coal produced in Canada in 1929, totalled 17,499,557 tons from the mines in Nova Scotia, New Brunswick, Saskatchewan, Alberta and British Columbia. Imports of coal last year amounted to 1,200,000 tons from the United States, tons came from that country.

Man (at restaurant)—"I wonder how this chicken could live with so little meat on it." Waiter—"It didn't—there's why it's here."

New and Appetizing

Recipe For Bacon Muffins Should Be Good

If you want to try something new and especially appetizing, follow this recipe for

Bacon Muffins

1. pound bacon.
2. tablespoon bacon fat.
- 1 egg, slightly beaten.
- 2 cups flour.
- 1/2 cup corn meal.
- 1 tablespoon sugar.
- 4 teaspoons baking powder.
- 1/2 teaspoon salt.
- 1/2 cup Birden's St. Charles Milk.
- 1/2 cup water.

Cut bacon in bits, fry crisp and drain off fat. Mix together the dry ingredients. Add the egg, bacon fat, and milk diluted with water. Fold in the bacon. Fill greased muffin pans two-thirds full. Bake in a moderate oven about twenty-five minutes.

Canada and World Trade

Stands Fifth As Regards Imports, Exports and Aggregate Trade. In a "Condensed Preliminary Report" for the fiscal year ended March 31, 1930, issued by the External Trade Branch of the Bureau of Statistics, Canada is still shown in fifth place as a world trader, being fifth as regards imports, exports and aggregate trade. Imports amounted to \$1,248,274,000 and exports to 144,938,000, making a total of \$2,393,212,000.

Plenty Of Advice

The Smithsonian Institution at Washington, is urging that farmers get an annual summary every year for the crop failure, which, it says, comes every seven years. At the same time the Department of Agriculture is urging reduction in acreage because supply exceeds the demand. Meanwhile, probably, the farmers are going ahead doing the best they can as they see things—Toronto Globe.

Never Had a Birthday

Colored Porter Is Made Happy When Records Are Searched After 73 Years

The "office boy" of the State Department of Education, down in Frankfort, Kentucky, is 73 years old, but he never had a birthday until a week ago. A birthday was officially presented by Henry Davis, negro porter of the department, at an impromptu party in his honor after closing hours.

Recently Davis confided to W. C. Daily, superintendent of public instruction, that he "disremembered" when he was born, but that it would be the greatest joy of his life to know what it was like to have a birthday like other folks.

Tears filled Henry's eyes when he was "presented with a humble certificate from Woodford County" showing that he was born a slave near Versailles, August 13, 1857. The records had been carefully searched for Henry's birthday.

"I knowed I was born free—free," said Henry. "Why I remember hearing the guns at Richmond."

How Man Has Progressed

Big Difference Between Voyages Of "Mayflower" and "R-100"

Three hundred and ten years ago, August 16, the "Mayflower" set sail for Plymouth Rock from England. This "Mayflower" of the century, general impression, began her voyage from Southampton. The pilgrims boarded the vessel at Plymouth, but the historic event actually began at Southampton.

The "Mayflower" was a little brigantine, and took three months to sail from Plymouth to Plymouth Rock. Today, ocean liners of over 50,000 tons sail from that same port of Southampton, and reach the other side in about five days.

And a few weeks ago the passengers on the Canadian Pacific liner "Laurentic" turned their gaze upward in the sky and saw the airship "R-100" speeding toward England at about seventy-five miles an hour. 1620-1930—this has man progressed.

Change in Marriage Law

British Columbia Passes New Law To Check Hasty Marriages

If impulsive couples "marry in haste and repent at leisure" in the future, they will have to go outside British Columbia to do it. Under legislation which came into effect on the first of September, eight days must elapse between the time a license is issued and the time the ceremony is performed.

In cases where an immediate marriage is desirable, however, special permission may be obtained. Clergymen must be registered with the provincial authorities in order to officiate.

Cement's Ingredients

The chief raw materials used in the manufacture of cement are limestone and clay.

Chain stores are invading Seattle.

Great Expense To Country

Number Of Mentally Deficient People In Canada Increasing

The number of insane and mentally deficient people in Canadian mental institutions, exclusive of private hospitals, shows an increase of 1,334 persons over last year, according to the annual bulletin of the Canadian National Committee of Mental Hygiene. The total number of insane and mentally deficient people who are filling these institutions is at present 29,579.

Their cost to the country, the bulletin points out, is greater than that of war pensions and totals \$16,820,743 a year. This, however, is simply the cost of upkeep of institutions and does not take into account the money spent by private individuals on insane people who are in private hospitals. Nor does it include the loss to the country which results from keeping a large group of people unproductive.

The tendency of social service workers and mental hygiene specialists at the present time is to pay more attention to signs of mental deficiency in its very early stages. Special attention is given to children who show signs of it and more care is taken to prevent cases of which it is frequently the outcome. Several of the provinces of Canada receive financial help from their governments toward this end.

Battle With Snake In Mid-Air

Kansas Aviator Has Encounter With Rattlesnake While Flying Through the Clouds

An unprecedented battle in the air between a horrified pilot and a rattlesnake was verified when Lt. "Happy" Wiggins, aviator, obtained snake-like treatment at a Scott City, Kansas, hospital.

Wiggins said he was pounding his "plane through the clouds almost a mile above the ground when the snake reared its head over the cockpit."

"I jumped back," said Wiggins, still violently ill from effects of the snake's poison, "but the snake jumped after me."

"I tried to grasp it and pitch it from the plane, but it coiled and struck me twice before I finally was able to fling it away."

While Wiggins was engaged in his unique battle with the rattlesnake, which apparently had crawled into the "plane while it was in a hangar, the ship hurtled down out of control. Wiggins finally pushed the snake overboard, righted the ship, and landed so hastily in a pasture that he almost wrecked the plane.

A rancher hurried out and dragged Wiggins, almost unconscious from fright and poison, from his seat. The rancher rushed him to Scott City, where hospital attendants said he would recover.

Galileo, the famous Italian astronomer, was the first man to look at the heavens through a telescope in 1610.

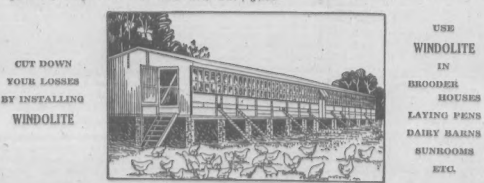

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute allows the full sunlight to enter, in light and flexible, easy to cut and fit, withstanding extreme changes in temperature, keeps out cold and wet, but glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.
